JOURNAL OF GUIDANCE, CONTROL, AND DYNAMICS
Volume 26, No. 6, November–December 2003

2003 *Journal of Guidance, Control, and Dynamics* Index

How to Use the Index

In the Subject Index, pages 984–987, each technical paper is listed under a maximum of three appropriate headings. Note the locating number in boldface type preceding each paper title, and use that number to find the paper in the Chronological Index. The Author Index, page 988, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 989–993, also lists all papers by their locating numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the ISBN number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 2003, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aeroelasticity and Aeroservoelasticity

G03-088 Historical Perspective on Analysis and Control of Aeroelastic Responses
G03-107 Trigonometric Models for Large-Angle Aerodynamic Force Coefficients
G03-021 Flutter Supression Using Linear Optimal and Fuzzy Logic Techniques
G03-057 Modular Adaptive Control of a Nolinear Aeroelastic System
G03-011 Neural Network Approach for Nonlinear Aeroelastic Analysis
G03-118 State-Dependent Riccati Equation for Control of Aeroelastic Flutter

Air Transportation

G03-016 Pilot-Performed In-Trail Spacing and Merging: An Experimental Study

Collision Avoidance

G03-012 Determining If Two Solid Ellipsoids Intersect

Deceleration Systems

G03-116 Aspects of Control for a Parafoil and Payload System

Flight Control Integration

G03-019 F-14 Aircraft Lateral–Directional Adaptive Control Using Subspace Stabilization

Flight Mechanics

G03-108 Two-Timescale Analysis of Phugoid Mode

Rotorcraft

G03-001 Helicopter Control Systems: A History

Safety

G03-114 Improved Clearance of a Flight Control Law Using u-Analysis Techniques

Testing, Flight and Ground

G03-002 Comparison of Agility Metrics to Beck Agility Metrics Using Linear Error Theory
G03-072 Effect of Tire Pressure on Aircraft Ground Handling

Computing, Information, and Communication

Autonomous Systems

G03-104 Evaluation of Longitudinal Desired Dynamics for Dynamic-Inversion Controlled Generic Reentry Vehicles

Guidance, Navigation, and Control Systems

G03-087 Stabilization of Optimum Trajectory Costate Differential Equations
G03-090 Optimal Update Scheme for Drag Reference Profiles in an Entry Guidance
G03-105 Global Positioning System-Based Attitude Determination and the Orthogonal Procrustes Problem
G03-106 New Proportional Navigation Law for Ground-to-Air Systems
G03-116 Aspects of Control for a Parafoil and Payload System

Signal Processing

G03-073 Nonlinear Statistical Approach for Aeroelastic Response Prediction

Fluid Dynamics

Boundary Layers and Heat Transfer—Laminar

G03-023 Dynamic Modeling of Ring Nutation Dampers

Unsteady Flows

G03-023 Dynamic Modeling of Ring Nutation Dampers

Guidance, Control, and Dynamics Technology

Aircraft Dynamics

G03-107 Trigonometric Models for Large-Angle Aerodynamic Force Coefficients
G03-108 Two-Timescale Analysis of Phugoid Mode
G03-002 Comparison of Agility Metrics to Beck Agility Metrics Using Linear Error Theory
G03-072 Effect of Tire Pressure on Aircraft Ground Handling
G03-015 Formation Flight Optimization Using Extremum Seeking Feedback
G03-053 Modeling Maneuver Dynamics in Air Traffic Conflict Resolution

Aircraft Guidance

G03-109 Discovery and Invention: The Newtonian Revolution in Systems Technology
G03-019 F-14 Aircraft Lateral–Directional Adaptive Control Using Subspace Stabilization
G03-053 Modeling Maneuver Dynamics in Air Traffic Conflict Resolution
G03-016 Pilot-Performed In-Trail Spacing and Merging: An Experimental Study

Aircraft Dynamics

G03-107 Trigonometric Models for Large-Angle Aerodynamic Force Coefficients
G03-108 Two-Timescale Analysis of Phugoid Mode
G03-002 Comparison of Agility Metrics to Beck Agility Metrics Using Linear Error Theory
G03-072 Effect of Tire Pressure on Aircraft Ground Handling
G03-015 Formation Flight Optimization Using Extremum Seeking Feedback
G03-053 Modeling Maneuver Dynamics in Air Traffic Conflict Resolution

Aircraft Guidance

G03-109 Discovery and Invention: The Newtonian Revolution in Systems Technology
G03-019 F-14 Aircraft Lateral–Directional Adaptive Control Using Subspace Stabilization
G03-053 Modeling Maneuver Dynamics in Air Traffic Conflict Resolution
G03-016 Pilot-Performed In-Trail Spacing and Merging: An Experimental Study

Aircraft Stability and Control

G03-020 Employing Soft Computing Techniques to Study Stability and Control in Aircraft Design
G03-019 F-14 Aircraft Lateral–Directional Adaptive Control Using Subspace Stabilization
G03-017 Fault Tolerant Flight Control
G03-015 Formation Flight Optimization Using Extremum Seeking Feedback
G03-001 Helicopter Control Systems: A History
G03-114 Improved Clearance of a Flight Control Law Using u-Analysis Techniques
G03-115 Longitudinal Flight Path Control Using On-Line Function Approximation
G03-060 Longitudinal Flying Qualities Prediction for Nonlinear Aircraft
G03-059 Multi-Input/Multi-Output Sliding Mode Control for a Tailless Fighter Aircraft
G03-058 Sliding Mode Control Applied to Reconfigurable Flight Control Design

Artificial Intelligence

G03-011 Neural Network Approach for Nonlinear Aeroelastic Analysis

Astrodynamics

G03-126 Control-Theoretic Analysis of Low-Thrust Orbital Transfer Using Orbital Elements
G03-086 Azimuthal Repositioning of Payloads in Heliocentric Orbit Using Solar Sails
G03-061 Algorithm for Autonomous Longitude and Eccentricity Control for Geostationary Spacecraft
G03-123 Constrained Circularization in Elliptic Oribt using Low-Thrust with Shadowing Effect
G03-122 Equilibria of Multibody Chain in Orbit Plane
G03-029 Escaping Trajectories in the Hill Three-Body Problem and Applications
G03-028 Formation Flying: Accommodating Nonlinearity and Eccentricity Perturbations
G03-031 Frozen Orbits About the Moon
G03-083 Instability of Fixed, Low-Thrust Drag Compensation
G03-079 Invariant Manifold Tracking for First-Order Nonlinear Hill's Equations
G03-048 Inverse Solar Sail Trajectory Problem
G03-084 Linearized Dynamic Equations for Spacecraft Subject to J2 Perturbations
G03-081 Lunar Gravitational Capture Conditions
G03-121 Minimum-Time Orbital Phasing Maneuvers
G03-097 New Class of Optimal Plane Change Manuevers
G03-103 Orbital Maneuvering with Electrodynamic Tethers
G03-005 Second-Order Relative Motion Equations
G03-030 Space Vehicle Maneuver Method to Lower Collision Risk to an Acceptable Level
G03-007 Stabilizing Motion Relative to an Unstable Orbit: Applications to Spacecraft Formation Flight
G03-124 State Transition Matrix of Relative Motion for the Perturbed Non-Circular Reference Orbit
G03-098 Statistical Analysis of Control Maneuvers in Unstable Orbital Environments
G03-004 Third-Body Perturbation in Orbits Around Natural Satellites
G03-076 Using Fractional Gaussian Noise Models in Orbit Determination

Autonomous Vehicles

G03-033 Attitude Regulation About a Fixed Rotation Axis
G03-104 Evaluation of Longitudinal Desired Dynamics for Dynamic-Inversion Controlled Generic Reentry Vehicles
G03-055 Integrated Hardware Investigations of Precision Spacecraft Rendezvous Using the Global Positioning System
G03-013 Onboard Generation of Three-Dimensional Constrained Entry Trajectories
G03-093 Reconfigurable Nonlinear Autopilot

Avionics Systems

G03-027 One Hundred Years of Aircraft Electronics

Computer Science

G03-012 Determining If Two Solid Ellipsoids Intersect

Control System Design

G03-062 Adaptive Neural Control of Deep-Space Formation Flying
G03-017 Fault Tolerant Flight Control
G03-021 Flutter Supression Using Linear Optimal and Fuzzy Logic Techniques
G03-015 Formation Flight Optimization Using Extremum Seeking Feedback
G03-001 Helicopter Control Systems: A History
G03-117 Limited Authority Adaptive Flight Control for Reusable Launch Vehicles
G03-115 Longitudinal Flight Path Control Using On-Line Function Approximation
G03-057 Modular Adaptive Control of a Nolinear Aeroelastic System
G03-059 Multi-Input/Multi-Output Sliding Mode Control for a Tailless Fighter Aircraft
G03-018 Nonlinear Disturbance Observer-Enhanced Dynamic Inversion Control of Missiles
G03-099 Planning Algorithm for Multiple Satellite Clusters
G03-070 Reconfigurable Flight Control System Design Using Direct Adaptive Method
G03-093 Reconfigurable Nonlinear Autopilot
G03-058 Sliding Mode Control Applied to Reconfigurable Flight Control Design
G03-102 Spacecraft Architecture for Disturbance-Free Payload
G03-026 Stability and Convergence of a Hybrid Adaptive Feedforward Observer
G03-118 State-Dependent Riccati Equation for Control of Aeroelastic Flutter

Control Theory

G03-109 Discovery and Invention: The Newtonian Revolution in Systems Technology
G03-126 Control-Theoretic Analysis of Low-Thrust Orbital Transfer Using Orbital Elements
G03-033 Attitude Regulation About a Fixed Rotation Axis
G03-017 Fault Tolerant Flight Control
G03-114 Improved Clearance of a Flight Control Law Using u-Analysis Techniques
G03-079 Invariant Manifold Tracking for First-Order Nonlinear Hill's Equations
G03-117 Limited Authority Adaptive Flight Control for Reusable Launch Vehicles
G03-058 Sliding Mode Control Applied to Reconfigurable Flight Control Design
G03-026 Stability and Convergence of a Hybrid Adaptive Feedforward Observer
G03-007 Stabilizing Motion Relative to an Unstable Orbit: Applications to Spacecraft Formation Flight

Differential Games

G03-038 New Interceptor Guidance Law Integrating Time-Varying and Estimation-Delay Models

Dynamics

G03-051 Contributions of Multibody Dynamics to Space Flight: A Brief Review
G03-122 Equilibria of Multibody Chain in Orbit Plane
G03-053 Modeling Maneuver Dynamics in Air Traffic Conflict Resolution
G03-097 New Class of Optimal Plane Change Manuevers
G03-009 New Form of Kane's Equations of Motion for Constrained Systems
G03-041 Timescale Analysis for Nonlinear Dynamical Systems

Flight Mechanics

G03-107 Trigonometric Models for Large-Angle Aerodynamic Force Coefficients
G03-002 Comparison of Agility Metrics to Beck Agility Metrics Using Linear Error Theory
G03-123 Constrained Circularization in Elliptic Oribt using Low-Thrust with Shadowing Effect
G03-122 Equilibria of Multibody Chain in Orbit Plane
G03-010 Flight Motion of a Continuously Elastic Finned Missile
G03-013 Onboard Generation of Three-Dimensional Constrained Entry Trajectories

Handling Qualities

G03-072 Effect of Tire Pressure on Aircraft Ground Handling
G03-120 Handling Qualities Criterion for Roll Control of Highly Augmented Aircraft
G03-060 Longitudinal Flying Qualities Prediction for Nonlinear Aircraft

Intelligent Control

G03-115 Longitudinal Flight Path Control Using On-Line Function Approximation
G03-070 Reconfigurable Flight Control System Design Using Direct Adaptive Method

Launch Vehicle Guidance and Control

G03-037 Closed-Loop Endoatmospheric Ascent Guidance
G03-117 Limited Authority Adaptive Flight Control for Reusable Launch Vehicles

Missile Dynamics

G03-010 Flight Motion of a Continuously Elastic Finned Missile

Missile Guidance and Control

G03-038 New Interceptor Guidance Law Integrating Time-Varying and Estimation-Delay Models
G03-018 Nonlinear Disturbance Observer-Enhanced Dynamic Inversion Control of Missiles
G03-110 Normalized Analysis of Interceptor Missiles Using the 4-State Optimal Guidance System

Navigation

G03-014 Detecting Global Positioning Satellite Orbit Errors Using Short-Baseline Carrier-Phase Measurements
G03-027 One Hundred Years of Aircraft Electronics
G03-100 Precise Ephemeris Reconstruction Using the Clohessy–Wiltshire Frame and Multiple Sequential Compressions
G03-098 Statistical Analysis of Control Maneuvers in Unstable Orbital Environments

Optimization Techniques

G03-037 Closed-Loop Endoatmospheric Ascent Guidance
G03-030 Space Vehicle Maneuver Method to Lower Collision Risk to an Acceptable Level
G03-087 Stabilization of Optimum Trajectory Costate Differential Equations

Pointing Systems

G03-102 Spacecraft Architecture for Disturbance-Free Payload

Redundancy Management

G03-027 One Hundred Years of Aircraft Electronics

Robotics

G03-035 Prediction Tools for Active Damping and Motion Planning of Flexible Manipulators

Signal Processing

G03-073 Nonlinear Statistical Approach for Aeroelastic Response Prediction
G03-099 Planning Algorithm for Multiple Satellite Clusters

Soft Computing

G03-020 Employing Soft Computing Techniques to Study Stability and Control in Aircraft Design
G03-011 Neural Network Approach for Nonlinear Aeroelastic Analysis

Software Technology

G03-066 Historical Review of Air-Bearing Spacecraft Simulators
G03-083 Instability of Fixed, Low-Thrust Drag Compensation

Spacecraft Dynamics

G03-051 Contributions of Multibody Dynamics to Space Flight: A Brief Review
G03-082 Heating and Modeling Effects in Tethered Aerocapture Missions
G03-083 Instability of Fixed, Low-Thrust Drag Compensation
G03-079 Invariant Manifold Tracking for First-Order Nonlinear Hill's Equations
G03-084 Linearized Dynamic Equations for Spacecraft Subject to J2 Perturbations
G03-103 Orbital Maneuvering with Electrodynamic Tethers
G03-005 Second-Order Relative Motion Equations
G03-030 Space Vehicle Maneuver Method to Lower Collision Risk to an Acceptable Level
G03-032 Spacecraft Attitude Rate Estimation from Geomagnetic Field Measurements
G03-004 Third-Body Perturbation in Orbits Around Natural Satellites

Spacecraft Guidance and Control

G03-062 Adaptive Neural Control of Deep-Space Formation Flying
G03-061 Algorithm for Autonomous Longitude and Eccentricity Control for Geostationary Spacecraft
G03-040 Attitude Error Representations for Kalman Filtering
G03-033 Attitude Regulation About a Fixed Rotation Axis
G03-049 Composite Estimate of Spacecraft Sensor Alignment Calibrations
G03-048 Inverse Solar Sail Trajectory Problem
G03-066 Historical Review of Air-Bearing Spacecraft Simulators
G03-109 Discovery and Invention: The Newtonian Revolution in Systems Technology
G03-113 Nondimensional Analysis of Reaction-Wheel Control for Aerobraking
G03-125 Observability of a Geosynchronous Spacecraft Attitude Determination System
G03-013 Onboard Generation of Three-Dimensional Constrained Entry Trajectories
G03-103 Orbital Maneuvering with Electrodynamic Tethers
G03-100 Precise Ephemeris Reconstruction Using the Clohessy–Wiltshire Frame and Multiple Sequential Compressions
G03-005 Second-Order Relative Motion Equations
G03-102 Spacecraft Architecture for Disturbance-Free Payload
G03-098 Statistical Analysis of Control Maneuvers in Unstable Orbital Environments
G03-039 Three-Axis Attitude Determination Using Global Positioning System Signal Strength Measurements

State Estimation

G03-040 Attitude Error Representations for Kalman Filtering
G03-105 Global Positioning System-Based Attitude Determination and the Orthogonal Procrustes Problem
G03-073 Nonlinear Statistical Approach for Aeroelastic Response Prediction
G03-125 Observability of a Geosynchronous Spacecraft Attitude Determination System
G03-032 Spacecraft Attitude Rate Estimation from Geomagnetic Field Measurements
G03-026 Stability and Convergence of a Hybrid Adaptive Feedforward Observer
G03-069 Unscented Filtering for Spacecraft Attitude Estimation
G03-076 Using Fractional Gaussian Noise Models in Orbit Determination

Structural Control

G03-088 Historical Perspective on Analysis and Control of Aeroelastic Responses
G03-085 Spacecraft Vibration Reduction Following Thruster Firing Orbit Adjustment
G03-068 Uncertainty Models and Robust Complex-Rational Controller Design for Flexible Structures

System Identification

G03-049 Composite Estimate of Spacecraft Sensor Alignment Calibrations
G03-093 Reconfigurable Nonlinear Autopilot
G03-071 Structured Model Reference Adaptive Control for a Class of Nonlinear Systems

Trajectory Optimization

G03-037 Closed-Loop Endoatmospheric Ascent Guidance
G03-123 Constrained Circularization in Elliptic Oribt using Low-Thrust with Shadowing Effect
G03-081 Lunar Gravitational Capture Conditions
G03-121 Minimum-Time Orbital Phasing Maneuvers
G03-095 Mission Functionality for Deflecting Earth-Crossing Asteroids/Comets
G03-097 New Class of Optimal Plane Change Manuevers
G03-099 Planning Algorithm for Multiple Satellite Clusters
G03-087 Stabilization of Optimum Trajectory Costate Differential Equations
G03-071 Structured Model Reference Adaptive Control for a Class of Nonlinear Systems
G03-080 Technique for Escape from Geosynchronous Transfer Orbit Using a Solar Sail

UAVs

G03-071 Structured Model Reference Adaptive Control for a Class of Nonlinear Systems

Interdisciplinary Topics

Analytical and Numerical Methods

G03-031 Frozen Orbits About the Moon
G03-052 Periodic Solutions in Electrodynamic Tethers on Inclined Orbits
G03-076 Using Fractional Gaussian Noise Models in Orbit Determination

Human Factors

G03-104 Evaluation of Longitudinal Desired Dynamics for Dynamic-Inversion Controlled Generic Reentry Vehicles
G03-016 Pilot-Performed In-Trail Spacing and Merging: An Experimental Study

Multidisciplinary Design Optimization

G03-020 Employing Soft Computing Techniques to Study Stability and Control in Aircraft Design

Sensor Systems

G03-014 Detecting Global Positioning Satellite Orbit Errors Using Short-Baseline Carrier-Phase Measurements

Launch Vehicle and Missile (LV/M) Technology

Missile Systems

G03-106 New Proportional Navigation Law for Ground-to-Air Systems

Vibration

G03-085 Spacecraft Vibration Reduction Following Thruster Firing Orbit Adjustment

Propulsion

Advanced Space Propulsion

G03-052 Periodic Solutions in Electrodynamic Tethers on Inclined Orbits

Space Technology

Aerobraking Configurations/Aerothermodynamics

G03-082 Heating and Modeling Effects in Tethered Aerocapture Missions

Aerobraking Flight Mechanics

G03-082 Heating and Modeling Effects in Tethered Aerocapture Missions
G03-113 Nondimensional Analysis of Reaction-Wheel Control for Aerobraking

Global Positioning System

G03-014 Detecting Global Positioning Satellite Orbit Errors Using Short-Baseline Carrier-Phase Measurements
G03-105 Global Positioning System-Based Attitude Determination and the Orthogonal Procrustes Problem
G03-055 Integrated Hardware Investigations of Precision Spacecraft Rendezvous Using the Global Positioning System
G03-039 Three-Axis Attitude Determination Using Global Positioning System Signal Strength Measurements

Mission Design and Analysis

G03-086 Azimuthal Repositioning of Payloads in Heliocentric Orbit Using Solar Sails
G03-061 Algorithm for Autonomous Longitude and Eccentricity Control for Geostationary Spacecraft
G03-084 Linearized Dynamic Equations for Spacecraft Subject to J2 Perturbations
G03-095 Mission Functionality for Deflecting Earth-Crossing Asteroids/Comets
G03-113 Nondimensional Analysis of Reaction-Wheel Control for Aerobraking
G03-007 Stabilizing Motion Relative to an Unstable Orbit: Applications to Spacecraft Formation Flight

Mission Trajectories (Earth and Interplanetary)

G03-086 Azimuthal Repositioning of Payloads in Heliocentric Orbit Using Solar Sails
G03-048 Inverse Solar Sail Trajectory Problem
G03-081 Lunar Gravitational Capture Conditions
G03-121 Minimum-Time Orbital Phasing Maneuvers
G03-004 Third-Body Perturbation in Orbits Around Natural Satellites

Space Systems

G03-055 Integrated Hardware Investigations of Precision Spacecraft Rendezvous Using the Global Positioning System
G03-095 Mission Functionality for Deflecting Earth-Crossing Asteroids/Comets
G03-052 Periodic Solutions in Electrodynamic Tethers on Inclined Orbits
G03-035 Prediction Tools for Active Damping and Motion Planning of Flexible Manipulators

Spacecraft Attitude Determination

G03-040 Attitude Error Representations for Kalman Filtering
G03-049 Composite Estimate of Spacecraft Sensor Alignment Calibrations
G03-023 Dynamic Modeling of Ring Nutation Dampers
G03-032 Spacecraft Attitude Rate Estimation from Geomagnetic Field Measurements
G03-039 Three-Axis Attitude Determination Using Global Positioning System Signal Strength Measurements
G03-069 Unscented Filtering for Spacecraft Attitude Estimation

Structural Mechanics and Materials

Aeroelasticity and Control

G03-088 Historical Perspective on Analysis and Control of Aeroelastic Responses
G03-010 Flight Motion of a Continuously Elastic Finned Missile
G03-057 Modular Adaptive Control of a Nolinear Aeroelastic System
G03-118 State-Dependent Riccati Equation for Control of Aeroelastic Flutter

Dynamic Model Analysis

G03-051 Contributions of Multibody Dynamics to Space Flight: A Brief Review

Flexible and Active Structures

G03-068 Uncertainty Models and Robust Complex-Rational Controller Design for Flexible Structures

Chronological Index

G01-153 Comments on "Literal Approximations to Aircraft Dynamics Modes" and "Consistent Approximations to Aircraft Longitudinal Modes". Giovanni Mengali, *University of Pisa, Italy* (**26**, 2, p. 380) Technical Comment/Readers Forum Reply (**26**, 2, p. 380)

G03-001 Helicopter Control Systems: A History. Raymond W. Prouty and H. C. Curtiss, Jr., (**26**, 1, p. 12) History/Lecture

G03-002 Comparison of Agility Metrics to Beck Agility Metrics Using Linear Error Theory. John Valasek and David Smith, *Texas A&M University* (**26**, 1, p. 19) Article based on AIAA Paper 2000-4313

G03-003 Long-Term Third-Body Effects Via Double Averaging. Roger A. Broucke, *University of Texas* (**26**, 1, p. 27) Article

G03-004 Third-Body Perturbation in Orbits Around Natural Satellites. Antonio Fernando Bertachini de Almeida Prado, *Instituto Nacional de Pesquisas Espaciais, Brazil* (**26**, 1, p. 33) ARTICLE

G03-005 Second-Order Relative Motion Equations. Christopher D. Karlgaard and Frederick H. Lutze, *Virginia Polytechnic Institute and State University* (**26**, 1, p. 41) Article

G03-006 Optimal Two-Impulse Rendezvous Using Multiple-Revolution Lambert Solutions. Haijun Shen and Panagiotis Tsiotras, *Georgia Institute of Technology* (**26**, 1, p. 50) Article

G03-007 Stabilizing Motion Relative to an Unstable Orbit: Applications to Spacecraft Formation Flight. D. J. Scheeres, F. -Y. Hsiao, and N. X. Vinh, *The University of Michigan* (**26**, 1, p. 62) Article based on AIAA Paper 2000-4135

G03-008 Optimal Impulsive Control of Relative Satellite Motion. William E. Wiesel, *Air Force Institute of Technology* (**26**, 1, p. 74) Article

G03-009 New Form of Kane's Equations of Motion for Constrained Systems. Adbulrahman H. Bajodah, Dewey H. Hodges, and Ye-Hwa Chen, *Georgia Institute of Technology* (**26**, 1, p. 79) Article

G03-010 Flight Motion of a Continuously Elastic Finned Missile. Charles H. Murphy and William H. Mermagen, Sr., (**26**, 1, p. 89) Article

G03-011 Neural Network Approach for Nonlinear Aeroelastic Analysis. Ovidiu Voitcu and Yau Shu Wong, *University of Alberta, Canada* (**26**, 1, p. 99) Article based on AIAA Paper 2002-1286

G03-012 Determining If Two Solid Ellipsoids Intersect. Salvatore Alfano, *The Aerospace Corporation*; and Meredith L. Greer, *Vanderbilt University* (**26**, 1, p. 106) Article

G03-013 Onboard Generation of Three-Dimensional Constrained Entry Trajectories. Zuojun Shen and Ping Lu, *Iowa State University* (**26**, 1, p. 111) Article

G03-014 Detecting Global Positioning Satellite Orbit Errors Using Short-Baseline Carrier-Phase Measurements. Boris Pervan and Fang-Cheng Chan, *Illinois Institute of Technology* (**26**, 1, p. 122) Article

G03-015 Formation Flight Optimization Using Extremum Seeking Feedback. Paolo Binetti, *Politecnico di Milano, Italy*; Kartik B. Ariyur and Miroslav Krstic, *University of California, San Diego*; and Franco Bernelli, *Politecnico di Milano, Italy* (**26**, 1, p. 132) Article

G03-016 Pilot-Performed In-Trail Spacing and Merging: An Experimental Study. A. R. Pritchett and L. J. Yankosky, *Georgia Institute of Technology* (**26**, 1, p. 143) Article based on AIAA Paper 2000-4472

G03-017 Fault Tolerant Flight Control. Meir Pachter, *Air Force Institute of Technology*; and Yih-Shiun Huang, *Chinese Air Force Academy, Taiwan, ROC* (**26**, 1, p. 151) Article

G03-018 Nonlinear Disturbance Observer-Enhanced Dynamic Inversion Control of Missiles. Wen-Hua Chen, *Loughborough University, England, UK* (**26**, 1, p. 161) Article

G03-019 F-14 Aircraft Lateral–Directional Adaptive Control Using Subspace Stabilization. C. Tournes, *Davidson Technologies, Inc*; and B. Landrum, *University of Alabama in Huntsville* (**26**, 1, p. 167) Engineering Note

G03-020 Employing Soft Computing Techniques to Study Stability and Control in Aircraft Design. Nicholas Ali and Kamran Behdinan, *Ryerson University, Canada* (**26**, 1, p. 169) Engineering Note

G03-021 Flutter Supression Using Linear Optimal and Fuzzy Logic Techniques. Zvi Adin, Joseph Z. Ben-Asher, Kelly Cohen, Boris Moulin and Tanchum Weller, *Technion–Israel Institute of Technology, Israel* (**26**, 1, p. 173) Engineering Note

G03-022 Optimal Trajectory Analysis for Deployment/Retrieval of Tethered Subsatellite Using Metric. Hironori A. Fujii and Hirohisa Kojima, *Tokyo Metropolitan Institute of Technology, Japan* (**26**, 1, p. 177) Engineering Note

G03-023 Dynamic Modeling of Ring Nutation Dampers. Reid Reynolds, *Spectrum Astro, Inc.* (**26**, 1, p. 180) Engineering Note

G03-024 Gravity-Turn Descent from Low Circular Orbit Conditions. Colin R. McInnes, *University of Glasgow, England, UK* (**26**, 1, p. 183) Engineering Note

G03-025 Riccati Dichotomic Basis Method for Solving Hypersensitive Optimal Control Problems. Anil V. Rao, *Charles Stark Draper Laboratory, Inc.* (**26**, 1, p. 185) Engineering Note

G03-026 Stability and Convergence of a Hybrid Adaptive Feedforward Observer. Chau M. Tran and Steve C. Southward, *North Carolina State University* (**26**, 1, p. 189) Engineering Note

G03-027 One Hundred Years of Aircraft Electronics. Myron Kayton, *Kayton Engineering Co.* (**26**, 2, p. 193) History/Lecture

G03-028 Formation Flying: Accommodating Nonlinearity and Eccentricity Perturbations. Sesha S. Vaddi, Srinivas R. Vadali, and Kyle T. Alfriend, *Texas A&M University* (**26**, 2, p. 214) Article

G03-029 Escaping Trajectories in the Hill Three-Body Problem and Applications. B. F. Villac and D. J. Scheeres, *The University of Michigan* (**26**, 2, p. 224) Article

G03-030 Space Vehicle Maneuver Method to Lower Collision Risk to an Acceptable Level. Russell P. Patera and Glenn E. Peterson, *The Aerospace Corporation* (**26**, 2, p. 233) Article

G03-031 Frozen Orbits About the Moon. Antonio Elipe, *Universidad de Zaragoza, Spain*; and Martin Lara, *Real Instituto y Observatorio de la Armada, Spain* (**26**, 2, p. 238) Article

G03-032 Spacecraft Attitude Rate Estimation from Geomagnetic Field Measurements. Mark L. Psiaki, *Cornell University*; and Yaakov Oshman, *Technion-Israel Institute of Technology, Israel* (**26**, 2, p. 244) Article

G03-033 Attitude Regulation About a Fixed Rotation Axis. Jonathan Lawton, *Raytheon Systems Inc.*; and Randal W. Beard, *Brigham Young University* (**26**, 2, p. 253) Article

G03-034 Slew Maneuver of a Flexible Space Structure with Constraint on Bending Moment. Hironori A. Fujii, Hirohisa Kojima, and Nobuyuki Nakajima, *Tokyo Metropolitan Institute of Technology, Japan* (**26**, 2, p. 259) Article

G03-035 Prediction Tools for Active Damping and Motion Planning of Flexible Manipulators. B. Pond, J. Van Vliet, and I. Sharf, *McGill University, Canada* (**26**, 2, p. 267) Article

G03-036 Output Feedback Control of Mechanical Systems with Application to Spacecraft and Robots. F. Caccavale, *Universita degli Studi della Basilicata, Italy*; C. Natale, *Seconda Universita degli Studi di Napoli, Italy*; and L. Villani, *Universita degliu Studi di Napoli Federico II, Italy* (**26**, 2, p. 273) Article

G03-037 Closed-Loop Endoatmospheric Ascent Guidance. Ping Lu, Hongsheng Sun, and Bruce Tsai, *Iowa State University* (**26**, 2, p. 283) Article based on AIAA Paper 2002-4558

G03-038 New Interceptor Guidance Law Integrating Time-Varying and Estimation-Delay Models. Tal Shima, *RAFAEL, Israel*; Josef Shinar, *Technion-Israel Institute of Technology, Israel*; and Haim Weiss, *RAFAEL, Israel* (**26**, 2, p. 295) Article based on AIAA Paper 2001-4344

G03-039 Three-Axis Attitude Determination Using Global Positioning System Signal Strength Measurements. E. Glenn Lightsey, *The University of Texas*; and Jared Madsen, *The University of Texas at Austin* (**26**, 2, p. 304) Article

G03-040 Attitude Error Representations for Kalman Filtering. F. Landis Markley, *University of Buffalo* (**26**, 2, p. 311) Article

G03-041 Timescale Analysis for Nonlinear Dynamical Systems. K. D. Mease, S. Bharadwaj, and S. Iravanchy, *University of California* (**26**, 2, p. 318) Article

G03-042 Uncertainty Estimation from Volterra Kernels for Robust Flutter Analysis. Richard J. Prazenica, Rick Lind, and Andrew J. Kurdila, *University of Florida* (**26**, 2, p. 331) Article based on AIAA Paper 2002-1650

G03-043 Role of Eigenvectors in Aircraft Dynamics Optimization. Giovanni Mengali, *University of Pisa, Italy* (**26**, 2, p. 340) Article

G03-044 Observer/Kalman Filter Identification for Online System Identification of Aircraft. John Valasek and Wei Chen, *Texas A&M University* (**26**, 2, p. 347) Article based on AIAA Paper 99-4173

G03-045 Low-Order Equivalent System Identification for the Tu-144LL Supersonic Transport Aircraft. Eugene A. Morelli, *NASA Langley Research Center* (**26**, 2, p. 354) Article

G03-046 Structured Multivariable Phase Margin Analysis with Applications to a Missile Autopilot. Jonathan R. Bar-on, *Science Applications International Corporation*; and Robert J. Adams, *Raytheon Missile Systems* (**26**, 2, p. 363) Engineering Note

G03-047 Coupling Numerators and Input–Output Pairing in Square Control Systems. R. A. Hess, *University of California* (**26**, 2, p. 367) Engineering Note

G03-048 Inverse Solar Sail Trajectory Problem. Colin R. McInnes, *University of Glasgow, England, UK* (**26**, 2, p. 369) Engineering Note

G03-049 Composite Estimate of Spacecraft Sensor Alignment Calibrations. Mark E. Pittelkau, *The Jonhs Hopkins University* (**26**, 2, p. 371) Engineering Note

G03-050 Dual-Spacecraft Formation Flying in Deep Space: Optimal Collision-Free Reconfigurations. Yoonsoo Kim, Mehran Mesbahi, and Fred Y. Hadaegh, *University of Washington* (**26**, 2, p. 375) Engineering Note

G03-051 Contributions of Multibody Dynamics to Space Flight: A Brief Review. Arun K. Banerjee, *Lockheed Martin Advanced Technology Center* (**26**, 3, p. 385) History/Lecture

G03-052 Periodic Solutions in Electrodynamic Tethers on Inclined Orbits. J. Peláez, *E.T.S.I. Aeronauticos-Universidad Politecnica de Madrid, Spain*; and M. Lara, *Real Observatorio de la Armada, Spain* (**26**, 3, p. 395) Article

G03-053 Modeling Maneuver Dynamics in Air Traffic Conflict Resolution. Russell A. Paielli, *NASA Ames Research Center* (**26**, 3, p. 407) Article

G03-054 Optimal Trajectory Planning for Hot-Air Balloons in Linear Wind Fields. Tuhin Das and Ranjan Mukherjee, *Michigan State University*; and Jonathan Cameron, *Jet Propulsion Laboratory* (**26**, 3, p. 416) Article

G03-055 Integrated Hardware Investigations of Precision Spacecraft Rendezvous Using the Global Positioning System. Takuji Ebinuma, Robert H. Bishop, and E. Glenn Lightsey, *The University of Texas* (**26**, 3, p. 425) Article

G03-056 Computing Danger Zones for Provably Safe Closely Spaced Parallel Approaches. Rodney Teo and Claire J. Tomlin, *Stanford University* (**26**, 3, p. 434) Article

G03-057 Modular Adaptive Control of a Nolinear Aeroelastic System. Sahjendra N. Singh, *University of Nevada*; and Marty Brenner, *NASA Dryden Flight Research Center* (**26**, 3, p. 443) Article

G03-058 Sliding Mode Control Applied to Reconfigurable Flight Control Design. R. A. Hess and S. R. Wells, *University of California, Davis* (**26**, 3, p. 452) Article

G03-059 Multi-Input/Multi-Output Sliding Mode Control for a Tailless Fighter Aircraft. S. R. Wells and R. A. Hess, *University of California, Davis* (**26**, 3, p. 463) Article

G03-060 Longitudinal Flying Qualities Prediction for Nonlinear Aircraft. Shiyang Ryu, *Samsung Electronics Co., LTD, Korea*; and Dominick Andrisani, *Purdue University* (**26**, 3, p. 474) Article

G03-061 Algorithm for Autonomous Longitude and Eccentricity Control for Geostationary Spacecraft. Brian P. Emma, *San Jose State University*; and Henry J. Pernicka, *University of Missouri-Rolla* (**26**, 3, p. 483) Article

G03-062 Adaptive Neural Control of Deep-Space Formation Flying. Pini Gurfil, *Princeton University*; Moshe Idan, *Technion-Israel Institute of Technology, Israel*; and N. Jeremy Kasdin, *Princeton University* (**26**, 3, p. 491) Article

G03-063 Algebraic Riccati-Equation-Based Differentiation Trackers. Salim Ibrir, *École de Technologie Supérieure, Canada* (**26**, 3, p. 502) Engineering Note

G03-064 Rapid Verification Method for the Trajectory Optimization of Reentry Vehicles. Scott Josselyn and I. Michael Ross, *Naval Postgraduate School* (**26**, 3, p. 505) Engineering Note

G03-065 Quaternion Controller Design Using Switched Linear Parameter-Varying Framework. Sungyung Lim and Kam Chan, *Space Systems/Loral* (**26**, 3, p. 508) Engineering Note

G03-066 Historical Review of Air-Bearing Spacecraft Simulators. Jana L. Schwartz, *Virginia Polytechnic Institute and State University*; Mason A. Peck, *Honeywell Space Systems*; and Christopher D. Hall, *Virginia Polytechnic Institute and State University* (**26**, 4, p. 513) History of Key Technologies

G03-067 Automated Method to Compute Orbital Reentry Trajectories with Heating Constraints. Curtis Zimmerman, Greg Dukeman, and John Hanson, *NASA Marshall Space Flight Center* (**26**, 4, p. 523) Article

G03-068 Uncertainty Models and Robust Complex-Rational Controller Design for Flexible Structures. Nabil Aouf, *Industrial Materials Institute, Canada*; and Benoit Boulet, *McGill University, Canada* (**26**, 4, p. 530) Article

G03-069 Unscented Filtering for Spacecraft Attitude Estimation. John L. Crassidis and F. Landis Markley, *University of Buffalo* (**26**, 4, p. 536) Article

G03-070 Reconfigurable Flight Control System Design Using Direct Adaptive Method. Ki-Seok Kim, Keum-Jin Lee, and Youdan Kim, *Seoul National University, Republic of Korea* (**26**, 4, p. 543) Article

G03-071 Structured Model Reference Adaptive Control for a Class of Nonlinear Systems. Kamesh Subbarao and John L. Junkins, *Texas A&M University* (**26**, 4, p. 551) Article

G03-072 Effect of Tire Pressure on Aircraft Ground Handling. David H. Klyde and Raymond E. Magdaleno, *Systems Technology Inc.,*; and James G. Reinsberg, *Boeing Company* (**26**, 4, p. 558) Article

G03-073 Nonlinear Statistical Approach for Aeroelastic Response Prediction. Cristina Popescu and Prof. Yau Wong, *University of Alberta, Canada* (**26**, 4, p. 565) Article based on AIAA Paper AIAA 2002-1281

G03-074 Helicopter Flight-Control Reconfiguration for Main Rotor Actuator Failures. Russell Enns and Jennie Si, *Arizona State University* (**26**, 4, p. 572) Article

G03-075 Stabilization of Helicopter Blades with Severed Pitch Links Using Trailing-Edge Flaps. Dr. Roberto Celi, *The University of Maryland* (**26**, 4, p. 585) Article

G03-076 Using Fractional Gaussian Noise Models in Orbit Determination. Winston C. Chow, *Naval Network and Space Operations Command*; and Paul W. Schumacher Jr., *Naval Space Command* (**26**, 4, p. 593) Article

G03-077 Optimal Strategy for Geostationary Orbit Acquisition Using Ion Propulsion. Christian Circi, *University of Rome "La Sapienza," Italy* (**26**, 4, p. 608) Article

G03-078 Solution of the Elliptic Rendezvous Problem with the Time as Independent Variable. Roger A. Broucke, *University of Texas* (**26**, 4, p. 615) Article

G03-079 Invariant Manifold Tracking for First-Order Nonlinear Hill's Equations. Jason W. Mitchell, *Air Force Research Laboratory*; and David L. Richardson, *University of Cincinnati* (**26**, 4, p. 622) Article

G03-080 Technique for Escape from Geosynchronous Transfer Orbit Using a Solar Sail. Victoria L. Coverstone and John E. Prussing, *University of Illinois at Urbana-Champaign* (**26**, 4, p. 628) Article

G03-081 Lunar Gravitational Capture Conditions. Scott R. Dahlke, *USAF Academy* (**26**, 4, p. 635) Article

G03-082 Heating and Modeling Effects in Tethered Aerocapture Missions. Paul Williams, Sherrin Yeo and Chris Blanksby, *RMIT University, Australia* (**26**, 4, p. 643) Article

G03-083 Instability of Fixed, Low-Thrust Drag Compensation. Colin R. McInnes, *University of Glasgow, England, UK* (**26**, 4, p. 655) Engineering Note

G03-084 Linearized Dynamic Equations for Spacecraft Subject to J2 Perturbations. I. Michael Ross, *Naval Postgraduate School* (**26**, 4, p. 657) Engineering Note

G03-085 Spacecraft Vibration Reduction Following Thruster Firing Orbit Adjustment. Arun Banerjee and Benjamin Diedrich, *Lockheed Martin Space Systems Co.* (**26**, 4, p. 659) Engineering Note

G03-086 Azimuthal Repositioning of Payloads in Heliocentric Orbit Using Solar Sails. Colin R. McInnes, *University of Glasgow, UK* (**26**, 4, p. 662) Engineering Note

G03-087 Stabilization of Optimum Trajectory Costate Differential Equations. Roger Barron and Cleon Chick III (**26**, 4, p. 665) Engineering Note

G03-088 Historical Perspective on Analysis and Control of Aeroelastic Responses. Vivek Mukhopadhyay, *NASA Langley Research Center* (**26**, 5, p. 673) History of Key Technologies

G03-089 General Class of Tensegrity Structures: Topology and Prestress Equilibrium Analysis. Darrell Williamson, *University of Wollongong, Australia*; and Robert E. Skelton, *University of California* (**26**, 5, p. 685) Article

G03-090 Optimal Update Scheme for Drag Reference Profiles in an Entry Guidance. Warner Grimm, *Universitaet Stuttgart, Germany*; Jacques Gerard van der Meulen, *Stork Product Engineering*; and A. J. Roenneke, *Astrium, Germany* (**26**, 5, p. 695) Article

G03-091 Probability of Midair Collision During Ultra Closely Spaced Parallel Approaches. Sharon W. Houck, *Seagull Technology, Inc.*; and J. David Powell, *Stanford University* (**26**, 5, p. 702) Article

G03-092 Improving Conventional Longitudinal Missile Autopilot Using Cerebellar Model Articulation Controller Neural Networks. C. C. Lin and Fu-Chuang Chen, *National Chiao-Tung University, Taiwan* (**26**, 5, p. 711) Article

G03-093 Reconfigurable Nonlinear Autopilot. Marc Bodson, *University of Utah* (**26**, 5, p. 719) Article based on AIAA Paper 2002-4549

G03-094 Satellite Collision Probability for Nonlinear Relative Motion. Russell P. Patera, *The Aerospace Corporation* (**26**, 5, p. 728) Article based on AIAA Paper 2002-4632

G03-095 Mission Functionality for Deflecting Earth-Crossing Asteroids/Comets. Sang- Young Park, *Yonsei University, Korea*; and Daniel D. Mazanek, *NASA Langley Research Center* (**26**, 5, p. 734) Article

G03-096 Orbits in a Generalized Two-Body Problem. Colin McInnes, *University of Glasgow, UK* (**26**, 5, p. 743) Article

G03-097 New Class of Optimal Plane Change Manuevers. Benjamin Villac and Daniel Scheeres, *University of Michigan* (**26**, 5, p. 750) Article based on AIAA Paper 2002-4724

G03-098 Statistical Analysis of Control Maneuvers in Unstable Orbital Environments. Cedric Renault and Daniel Scheeres, *University of Michigan* (**26**, 5, p. 758) Article based on AIAA Paper 2002-4725

G03-099 Planning Algorithm for Multiple Satellite Clusters. Mark E. Campbell, *Cornell University* (**26**, 5, p. 770) Article

G03-100 Precise Ephemeris Reconstruction Using the Clohessy–Wiltshire Frame and Multiple Sequential Compressions. Deok-Jin Lee, *Texas A&M University*; Tae Soo No and Seok-Woo Choi, *Chonbuk National University, Korea*; Sang-Ryul Lee and Hak-Jung Kim, *Korea Aerospace Research Institute, Korea*; and Kyle T. Alfriend, *Texas A&M University* (**26**, 5, p. 781) Article

G03-101 Analysis of Frozen Conditions and Optimal Frozen Orbit Insertion. Manop Aorpimai, *Mahanakorn University of Technology, Thailand*; and Phil Palmer, *University of Surrey, UK* (**26**, 5, p. 786) Article

G03-102 Spacecraft Architecture for Disturbance-Free Payload. Nelson Pedreiro, *Lockheed Martin Advanced Technology Center* (**26**, 5, p. 794) Article based on AIAA Paper AIAA 02-5029

G03-103 Orbital Maneuvering with Electrodynamic Tethers. Steven Tragesser and Hakan San, *Air Force Institute of Technology* (**26**, 5, p. 805) Article

G03-104 Evaluation of Longitudinal Desired Dynamics for Dynamic-Inversion Controlled Generic Reentry Vehicles. Jennifer Georgie, *Lockheed Martin Aeronautics Company*; and John Valasek, *Texas A&M University* (**26**, 5, p. 811) Article based on AIAA Paper 2001-4382

G03-105 Global Positioning System-Based Attitude Determination and the Orthogonal Procrustes Problem. Thomas Bell, *Lockheed Martin Management and Data Systems* (**26**, 5, p. 820) Engineering Note

G03-106 New Proportional Navigation Law for Ground-to-Air Systems. Joseph Z. Ben-Asher *echnion–Israel Institute of Technology, Israel*; Nathan Farber, *Wales Ltd., Israel*; and Sergei Levinson, *Technion–Israel Institute of Technology, Israel* (**26**, 5, p. 822) Article

G03-107 Trigonometric Models for Large-Angle Aerodynamic Force Coefficients. Roger L. Barron (**26**, 5, p. 825) Engineering Note

G03-108 Two-Timescale Analysis of Phugoid Mode. Fabrizio Giulietti, *University of Bologna, Italy* (**26**, 5, p. 827) Engineering Note

G03-109 Discovery and Invention: The Newtonian Revolution in Systems Technology. Rudolf Kalman, *Swiss Federal Institute of Technology, Switzerland* (**26**, 6, p. 833) History of Key Technologies

G03-110 Normalized Analysis of Interceptor Missiles Using the 4-State Optimal Guidance System. Joel Alpert, *MIT Lincoln Laboratory* (**26**, 6, p. 838) Article

G03-111 Attitude Control of a Reentry Vehicle Internal Dynamics. Elmar M. Wallner and Klaus H. Well, *University of Stuttgart, Germany* (**26**, 6, p. 846) Article based on AIAA Paper 2002-4647

G03-112 Rotation Vector in Attitude Estimation. Mark E. Pittelkau, *The Jonhs Hopkins University* (**26**, 6, p. 855) Article

G03-113 Nondimensional Analysis of Reaction-Wheel Control for Aerobraking. Wyatt R. Johnson, *Jet Propulsion Laboratory, California Institute of Technology*; James M. Longuski, *Purdue University*; and Daniel T. Lyons, *Jet Propulsion Laboratory, California Institute of Technology* (**26**, 6, p. 861) Article

G03-114 Improved Clearance of a Flight Control Law Using u-Analysis Techniques. Declan G. Bates and Ridwan Kureemun, *University of Leicester, UK*; and Thomas Mannchen, *University of Stuttgart, Germany* (**26**, 6, p. 869) Article

G03-115 Longitudinal Flight Path Control Using On-Line Function Approximation. Professor Jay Farrell, *University of California-Riverside*; Manu Sharma, *Barron Associates Inc.*; and Marios Polycarpou, *University of Cincinnati* (**26**, 6, p. 885) Article

G03-116 Aspects of Control for a Parafoil and Payload System. Nathan Slegers and Mark Costello, *Oregon State University* (**26**, 6, p. 898) Article

G03-117 Limited Authority Adaptive Flight Control for Reusable Launch Vehicles. Eric N. Johnson and Anthony J. Calise, *Georgia Institute of Technology* (**26**, 6, p. 906) Article based on AIAA Paper 2000-4157

G03-118 State-Dependent Riccati Equation for Control of Aeroelastic Flutter. M. Tadi, *University of Colorado at Denver* (**26**, 6, p. 914) Article

G03-119 Design Sensitivity Analysis for Helicopter Flight Dynamic and Aeromechanic Stability. Dario Fusato and Roberto Celi, *University of Maryland, College Park* (**26**, 6, p. 918) Article

G03-120 Handling Qualities Criterion for Roll Control of Highly Augmented Aircraft. V. V. Rodchenko, L. E. Zaichik, and Yu P. Yashin, *TsAGI, Russia* (**26**, 6, p. 928) Article

G03-121 Minimum-Time Orbital Phasing Maneuvers. Christopher D. Hall and Victor Collazo-Perez, *Virginia Polytechnic Institute and State University* (**26**, 6, p. 934) Article

G03-122 Equilibria of Multibody Chain in Orbit Plane. Anna D. Guerman, *University of Beira Interior, Portugal* (**26**, 6, p. 942) Article

G03-123 Constrained Circularization in Elliptic Oribt using Low-Thrust with Shadowing Effect. Jean A. Kechichian, *The Aerospace Corporation* (**26**, 6, p. 949) Article based on AIAA Paper 2002-4894

G03-124 State Transition Matrix of Relative Motion for the Perturbed Non-Circular Reference Orbit. Dong-Woo Gim and Kyle T. Alfriend, *Texas A&M University* (**26**, 6, p. 956) Article

G03-126 Control-Theoretic Analysis of Low-Thrust Orbital Transfer Using Orbital Elements. Pini Gurfil, *Princeton University* (**26**, 6, p. 979) Engineering Note

G03-125 Observability of a Geosynchronous Spacecraft Attitude Determination Systemination System. Xipu Li and Neil Goodzeit, *Lockheed Martin Commercial Space Systems* (**26**, 6, p. 972) Article
